

# New Bookmarking Feature

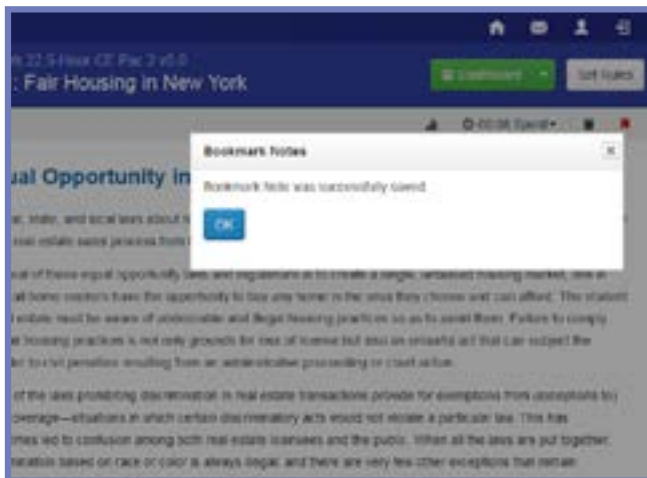

Dearborn courses now have a new bookmarking feature that allows you to mark portions of your courses with notes.

The bookmark icon appears in the gray toolbar.

When a student clicks on the bookmark icon, the **Bookmark Notes** box pops up. They can take notes in this dialog box and save them.

Once students save their notes, they will receive a confirmation when the icon turns red on the page.

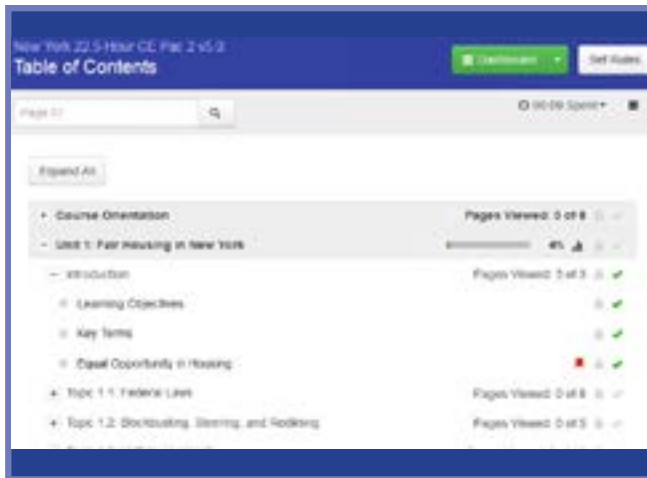

Bookmarking Feature

# New *Bookmarking Feature*

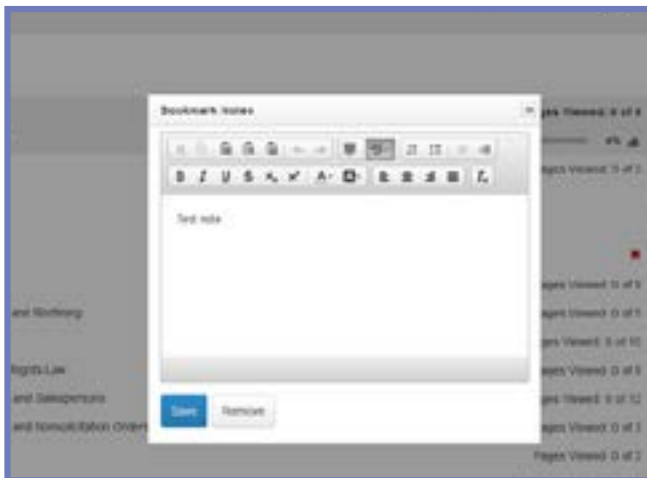

Dearborn courses now have a new bookmarking feature that allows you to mark portions of your courses with notes.

In the **Table of Contents** view (left nav), the red bookmark icon will appear, showing a **Bookmark Note** has been left on this page.

The bookmark icon is also viewable from the full **Table of Contents** page.

If a student clicks on the bookmark in the Table of Contents, the **Bookmark Note** will open without requiring them to return to the page of content.
